

WaveAngle announces Radian™ Wireless Instrument Systems

Austin, TX – January 15, 2009 - WaveAngle, manufacturer of high performance wireless solutions for professional sound reinforcement, announced today the launch of the Radian™ Gold Series wireless instrument systems for guitar and bass guitar.

The WaveAngle Radian™ is the first in the industry to combine crystal-clear audio quality, rock-solid digital wireless connectivity, and enhanced usability and features, all in an ultra-compact form factor.

The Radian™ Gold Series offers best-in-class audio performance with fully uncompressed CD-quality digital audio streaming. A high fidelity signal chain, complete with 128x oversampling and integrated auto level controls delivers uncompromised signal and superior tone.

Designed from the ground up with cutting edge digital RF technology, the WaveAngle Radian™ operates in the 2.4GHz world-wide license free ISM radio band for reliability and future-proof flexibility. Using modern wireless networking techniques, the Radian™ Gold Series integrates QoS engines and advanced frequency hopping to ensure robust communications for locked-in sound and wired-equivalent reliability.

Packing powerful features and ease of use, the Radian™ brings the ultimate in performance and usability in a stunningly elegant solution. “The creative design, unbeatable audio performance, and powerful feature set make Radian™ Wireless Instrument System the most unique and exciting product offering in its class”, says Sean Michaud, president of WaveAngle Incorporated.

Radian Gold Series Wireless Guitar System MSRP: \$299
